

**I am not alive, but I grow; I don't have lungs,
but I need air; I don't have a mouth, but water
kills me. What am I?**

Answer: Fire ?

Explanation: I am not alive, but I grow because fire spreads and consumes everything in its path. Although I don't have lungs, I need air to survive and keep burning brighter. But be careful, because water kills me! It's like I'm allergic to a refreshing splash ?? So remember, if you see me dancing and crackling, just keep the water away and let me shine! ??
